GScholar

Summary

I'm an AI researcher specializing in data stream learning, with a focus on Neural Networks, Gradient Boosting, and Online Learning. My work tackles concept drift adaptation and catastrophic forgetting in streaming scenarios. I contribute to the MOA and CapyMOA frameworks, have published in top venues, delivered tutorials, and led multiple industry ML projects. Explore my GitHub for source code.

Recent Publications

Projects

KEEPER	transforms industrial data into actionable insights using AI, to optimize assets like trucks, pumps, and network equipment, collaborating with Swedish industry partners and research institutes.
FREEWAY	is an asynchronous federated learning framework which enhances commercial EV fleet analytics via real-time ML, edge computing and MLOps.
AIM-TRUE	uses AI to optimize Volvo's aftermarket services, boosting efficiency and part availability via predictive logistics.
CapyMOA	Stream Learning Framework.
MOA	Massive Online Analysis Stream Learning Framework.
Project with Civil Engineers	to predict the Axial Capacity of Cold-Formed Steel.

Employment History

- 2024 –  **Postdoctoral Fellow**, Halmstad University. Sweden.
Part of the research team at the broader KEEPER project.
AIM-TRUE project with Volvo Logistics.
FREEWAY project with Volvo Group Truck Technology.
- 2021 – 2024  **Research Assistant**, Artificial Intelligence Institute, University of Waikato. NZ.
Develop CappyMOA Stream Learning Framework.
Maintain MOA (Massive Online Analysis) Stream Learning Framework.
Project with Civil Engineers to predict the Axial Capacity of Cold-Formed Steel.
- 2021 – 2022  **Teaching Assistant (Machine Learning COMPX310)**, University of Waikato.
- 2010 – 2020  **Senior Software Engineer**. Endace Technologies Ltd. New Zealand.
Develop and maintain high-speed network packet capturing and analysing tools.

Education

- 2020 – 2023  **Ph.D., University of Waikato**, Hamilton, NZ.
Thesis title: *Advanced Adaptive Classifier Methods for Data Streams*.
- 2008 – 2010  **M.Sc. Information Sciences, Auckland University of Technology**, NZ.
Thesis title: *Meta learning on string kernel SVMs for string categorization*.
- 2005 – 2007  **B.Sc. Management Information Systems, University College Dublin**, Ireland.

Skills

- ML Frameworks  ML: Pytorch, Deep Java Library (DJL), Scikit-learn, Weka. Stream Learning: MOA, CappyMOA, Scikit-multiflow, Avalanche. AutoML: FLAML
- ML Techniques  Neural Networks, Boosting, Bagging, Drift detection & adaptation
- Programming Languages  Java, C, Python, bash, CUDA Programming

Tutorials, Workshops, Talks, Program Committees, Board Member

- Tutorials  *Machine Learning on the Fly: A Hands-On Tutorial for Streaming Data*. ICDE, Hong Kong, 2025.
Machine Learning on Streaming Data. Volvo, Sweden, 2025.
Data stream learning with CappyMOA. IJCAI, Jeju, South Korea, 2024.
- Workshops  Time-Evolving Data Science / Artificial Intelligence for Advanced Open Environmental Science (TAIAO)[2021, 2022]
- Talks  "Online Hyperparameter Optimization for Streaming Neural Networks", Cardiff University - Machine Learning Seminar, 2022
- Guest Lecture  Advanced Topics in Stream Learning, University of Waikato, - Data Stream Mining (COMPX523 Masters Course), 2023
- Teaching  Jointly taught *Big Data Parallel Programming (2025)* course.
Jointly taught *Programming for Data Science (2024)* course.
- Program Committee Member  IJCAI Survey Track, 2024/2025
IJCAI Human-centred AI Special Track 2025,
ECML-PKDD Research Track 2025
- Conference Committee Member  New Zealand Artificial Intelligence Researchers Association 2024
- Board Member  New Zealand Artificial Intelligence Researchers Association, 2024
- Core maintainer  CappyMOA Stream Learning Platform

Honors & Awards

Awards and Achievements

- 2020-2024  **Research & Enterprise Study Award**, AI Institute, University of Waikato.
Three and half year scholarship is funded by the "*Entrepreneurial Universities - Real time analytics for Big Data*" project at AI Institute, University of Waikato.
